Ukemeobong Uduak Umo-Udofia

Software Programmer | AI Automation Specialist

Lagos, Nigeria · (+234)08135494115 · ukemeobonguduak@gmail.com · github.com/Keme28

SUMMARY

AI automation specialist and full-stack programmer with 1+ years designing and shipping automated workflows that combine LLMs, Robotic Process Automation (RPA), AI agents, and custom code. I am Skilled at finding manual, repetitive processes across a business and rebuilding them as reliable, monitored systems, from lead-qualification pipelines to internal document-processing agents. I build websites and applications whilst integrating automation into the core framework. Comfortable owning a project end-to-end.

TECHNICAL SKILLS

Languages	Python, TypeScript/JavaScript, SQL, Bash
Automation	N8N, Make, Zapier, PowerShell automation, custom Python agents, webhook/API orchestration
Data & Infra	PostgreSQL, Docker
Practices	Process discovery & mapping, workflow monitoring, website and application Development, technical documentation

EXPERIENCE

Futybills Tech — *Akwa Ibom, Nigeria* September 2026 – Present

AI Automation Specialist

- Built n8n and Zapier workflows connecting CRM, billing, and support tools, eliminating an estimated 15 hours/week of manual data entry across teams.
- Designed and shipped a Retrieval-Augmented Generation (RAG) internal support agent over 40k+ knowledge-based articles, cutting average ticket resolution time by 35%.
- Built a Python automation pipeline that converts a topic or script into finished short-form or long-form videos (with neural voiceovers and matched stock images and videos) using free APIs and local tools like PowerShell, cutting production from hours of manual work to a few commands

River State High Court — *Port Harcourt, Rivers State* June 2026 – September 2026

Junior Software Programmer, Automation

- Built a full-stack locally hosted portal that automates High Court quarterly returns and case analytics by syncing live Excel data into interactive dashboards featuring performance matrices, judgment tracking, case-age analytics, and print-ready official reports.

Zeerocodes Labs — *Remote* Jul 2025 – June 2026

Junior Software Programmer, Intern AI Automation Specialist

- Designed and built a complete multi-workflow automation system in n8n for a private security company, covering daily shift management, real-time guard check-ins, absence detection, and incident reporting.
- Developed a Python + LLM document-summarization tool for the customer service team, reducing account-review prep time by 60%.
- Wrote internal RPA scripts (UiPath, Python) that automated recurring reporting tasks, saving the finance team roughly 6 hours per week.

PROJECTS

EduNotify – School Portal Web Application

- Designed and developed a full-stack school management portal using Next.js 15, TypeScript, Tailwind CSS, and Airtable as the backend.
- Implemented secure server-side data fetching, role-based authentication (School Admin & Parent), and a responsive modern UI.
- Deployed the application on Vercel with environment variable protection for sensitive API keys.

EDUCATION

Futybills Tech Academy — *Uyo, Akwa Ibom State* 2025 – 2026
Certificate in AI Automation and AI-Powered Software Development

University of Uyo at Akwa Ibom — *Akwa Ibom, Nigeria* 2021 – 2025
B.S. in Human Anatomy

CERTIFICATIONS

- Human Anatomy
- AI Automation and AI-Powered Software Development
